[LinkedIn Profile](#)

Assiut, Egypt

CORE SKILLS

- Python
- C++
- Arduino C/C++
- Arduino development
- Embedded systems
- Circuit design
- Sensor integration
- Hardware debugging
- Git and GitHub
- Microsoft Office

LANGUAGES

Arabic - Native
English - Professional Working Proficiency

FOCUS AREAS

Embedded systems
Competitive programming
Innovation-driven engineering

PROFILE

Communication and Information Engineering student with a strong STEM background, hands-on embedded systems experience, and active development in competitive programming. Experienced in Arduino-based projects, circuit simulation, sensor integration, microcontroller programming, and engineering problem solving.

EDUCATION

Zewail City of Science, Technology and Innovation

B.Sc. in Communication and Information Engineering | 2025 - Present

Assiut STEM School

High School Diploma, STEM Track | Graduated 2025

- Ranked 1st in the Mathematics Track in Grade 12.
- Built engineering and research-based capstone projects using embedded systems and Arduino solutions.

ENGINEERING PROJECTS

Arduino-Based Embedded Systems Projects

- Designed and implemented Arduino systems using sensors, microcontrollers, and electronic circuits.
- Simulated circuit designs before physical implementation and tested system behavior through experiments.
- Developed automated monitoring and control systems and resolved hardware-software integration issues.

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

Leaders of Tomorrow Program

Leadership Development Program

- Completed all modules and earned Student of the Module in 3 out of 5 modules.
- Practiced leadership, teamwork, communication, and problem solving through workshops and group projects.

Digital Egypt Cubs Initiative, DECI

Ministry of Communications and Information Technology, Egypt

- Completed the program and contributed to a graduation project ranked 2nd within the physical group cohort.
- Gained practical experience in technology, innovation, project development, and teamwork.

COMPETITIVE PROGRAMMING

Egyptian Collegiate Programming Contest, ECPC

Participant

- Solved programming challenges under time constraints with focus on algorithms and data structures.
- Continues to build algorithmic thinking and software development skills.

ADDITIONAL ACHIEVEMENTS

- Conducted scientific research activities under university faculty mentorship during high school.
- Participated in scientific workshops, conferences, and research-oriented learning experiences.
